

Annex F: Consent form

UNITED KINGDOM PRE ENTRY TUBERCULOSIS SCREENING PROGRAMME

| |
|------------------|
| Name: |
| Date of birth |
| Clinic location: |

Applicant's Declaration:

I understand that:

- I am required to undergo testing for pulmonary tuberculosis (TB), involving an X-ray and possibly sputum tests, prior to applying for entry clearance to go to the UK;
- If my chest X-ray is abnormal, I will receive individual counselling and an explanation of the further testing procedures.
- If my chest X-ray is abnormal, and changes are suggestive of tuberculosis, regardless of whether these changes are old or new, or if there are other clinical reasons to suspect TB, I will have to provide 3 sputum samples which will be tested for TB with smear and culture. I understand that the results of sputum cultures may take up to ten weeks
- If sputum samples are necessary, I will be required to return for sputum collection on 3 consecutive mornings starting within 7 days of my chest X-ray. If I fail to return within 7 days, I will forfeit the opportunity to obtain a TB Certificate.
- If the smear or culture shows the presence of TB bacteria, I will be referred for TB treatment. Treatment shall be at my own expense; I will inform the TB treatment facility that I have close family contacts, who may need evaluation for TB.
- I have the right to refuse to undergo the TB assessment procedure and TB treatment, but accept such a refusal may adversely impact on my UK visa application.
- I understand that the physician has the final decision about whether I receive a Certificate

Female applicants

All female applicants will be asked about their last menstrual period to identify applicants who possibly may be pregnant:

- If I could be pregnant, I will be offered several alternatives; 1) a chest X-ray with protective shield; 2). I can postpone the CXR (and TB clearance) until after delivery or 3) I can opt to provide 3 sputum samples for laboratory examination.
- I acknowledge that a CXR can carry a risk for the unborn child, but that this risk is quite small in the second and third trimester. I am therefore advised to consult the panel physician and may wish to consult my gynaecologist to understand the risks before I take a chest X-ray. If I decide to submit to an X-ray, this shall be at my own risk.

I hereby:

- consent to undergo TB testing;
- authorise you and your designated laboratory to store all relevant personal information collected during the assessment process, including health records and chest X-ray;
- authorise you and your designated clinics to share my personal details and assessment results with the UK immigration authorities, the UK Department of Health, Public Health England and the UK National Health Service.
- I authorise you to share my assessment results with the health authorities of my country of residence, where this is required by my country's laws. I release and hold harmless the UK Government and you from any liability for loss, injury suffered or other harm during, or as a result of, the TB assessment procedures

I have read this consent form, or had translated for me. I was invited to ask questions to clarify what was not clear to me. I understand the content of this declaration.
